THAMARAIBHARANI P

Python Full Stack Developer | Selenium Automation Tester

+91 8838860712 | thamaraibharani0908@gmail.com | Bangalore, Karnataka
LinkedIn | Portfolio | GitHub

Professional Summary

B.Sc. Computer Science graduate (2026) with Python Full Stack training and hands-on Selenium automation experience from an internship at Besant Technologies. Built a self-healing test automation framework with an analytics dashboard and automated reporting for an e-commerce application. Skilled in Python, Flask, SQL, Selenium WebDriver (Python, Java) and Pytest. Seeking an entry-level Software Engineer, Python Developer or Automation Test Engineer role.

Technical Skills

- **Programming:** Python, Java
- **Automation Testing:** Selenium WebDriver (Python, Java), Pytest, XPath, CSS Selectors, Test Automation Framework, Self-Healing Locators, Automated Reporting
- **Manual Testing:** Functional Testing, Regression Testing, Test Case Design, SDLC, STLC
- **Web and Database:** Flask, HTML, CSS, Bootstrap, CRUD, SQL, MySQL, SQLite

Internship Experience

Python Selenium Automation Testing Intern | Besant Technologies | Jun 2026 – Oct 2026

- Automated web UI test scenarios using Selenium WebDriver, Python and Pytest, locating elements with XPath and CSS selectors.
- Practised Selenium WebDriver with Java and wrote SQL queries for data handling during testing.
- Designed and executed functional and regression test cases following SDLC and STLC.

Projects

Smart E-Commerce Test Automation Framework with Self-Healing, Analytics Dashboard and Automated Reporting (Internship Project)

Technologies: Python, Selenium WebDriver, Pytest, Flask, SQLite

- Built a Selenium and Pytest framework that automates functional and regression tests for an e-commerce web application (product search, categories, cart).
- Implemented a self-healing mechanism that detects broken XPath and CSS locators and recovers them automatically, so tests keep running after UI changes without manual script fixes.
- Developed a Flask and SQLite analytics dashboard showing pass/fail trends and healed locators, with automated test execution reports generated after every run.

Smart Voice Assisted Email Management System for Visually Impaired Individuals (Academic Project)

Technologies: Python, Flask, SQLite, HTML, Bootstrap, Web Speech API

- Developed a web-based email management system with compose, send, delete and organize features using Flask.
- Integrated voice input and text-to-speech functionality for accessibility.
- Managed data using SQL/SQLite and designed responsive interfaces with HTML and Bootstrap.

Education

B.Sc. Computer Science | 2023-2026
Sri Vasavi College (Self-Finance Wing) , Bharathiar University
Percentage: 84%

Higher Secondary Education |2018-2020
MRG Government Girls Higher Secondary School
Percentage: 62%

Training and Certifications

- Full Stack Development with Python – KGiSL Micro College
- Python Selenium Automation Testing – Besant Technologies
- State First Rank – Shakespeare Talent Examination
- Presented a paper on Big Data
